

WHY MASSAGE?

MASSAGE REDUCES MUSCLE TENSION AND STIFFNESS

- When sitting and standing in a fixed position for long periods of time, the muscles in those regions can become overworked and tense. Massage is a holistic way of addressing those issues.
- When lifting weights and performing other strength building exercises for the back, the tension created by the healing muscles can be managed through massage.

MASSAGE PROMOTES CIRCULATION AND BLOOD FLOW

- For runners and people on their feet, the compression style of massage can help reduce or prevent “charley horses” and promote positive blood flow in the feet releasing tension.
- Physical manipulation of the muscle groups by massage also stimulates blood flow in areas that are frequently neglected and hard to reach.

MASSAGE PROVIDES STRESS RELIEF

- The problems of a busy life fall by the wayside when you’re enjoying a massage. You don’t have anything to do or anywhere to be. All you have to do is enjoy your time and experience.

SYNCA

INDUSTRY LEADING DUAL LAYER BODY SCAN - Provides a superior customized massage experience by using two unique body scan methods measuring the length, curvature, and depth of each user's back prior to beginning the massage.

Dual Layer Body Scan optimizes the "depth" and "point" of the massage.

4D MASSAGE - Massage movements automatically vary their height, speed, pressure, and rhythm to provide the most life-like massage possible.

NEARLY 5 INCHES OF 3D BACK MASSAGE STRENGTH ADJUSTMENT

MULTI REGION AIR MASSAGE WITH STRENGTH CONTROL

Users can adjust the air massage compression intensity for independent regions rather than all regions at the same time, enabling the user to achieve their ideal massage experience.
